| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                                 |
| Immunogen                | Peptide sequence around phosphorylation site of tyrosine1221/1222 (N-L-Y(p)-Y(p)-W) derived from Human HER2.                                                                                                                                                          |
| Produktbeschreibung      | Essential component of a neuregulin-receptor complex, although neuregulins do not interact with it alone. GP30 is a potential ligand for this receptor. Not activated by EGF, TGF- $\alpha$ and amphiregulin. Marone R, et al. (2004) Nat Cell Biol, 6(6): 515-22.... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                            |
