| Immunogen                | Peptide sequence around phosphorylation site of serine 641 (D-D-S(p)-D-F) derived from Human $\alpha$ -catenin.                                                                                                                                               |
| Produktbeschreibung      | Associates with the cytoplasmic domain of a variety of cadherins. The association of catenins to cadherins produces a complex which is linked to the actin filament network, and which seems to be of primary importance for cadherins cell-adhesion prope... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
