| Spezies Reaktivität      | Human, Mouse, Rat                                                                                                                                                                                                                                                          |
| Immunogen                | Peptide sequence around phosphorylation site of threonine360/serine 362 (V-P-T(p)-P-S(p)-P-L) derived from Human CK2a.                                                                                                                                                     |
| Produktbeschreibung      | Casein kinases are operationally defined by their preferential utilization of acidic proteins such as caseins as substrates. The $\alpha$ and $\beta$ chains contain the catalytic site. Participates in Wnt signaling. CK2 phosphorylates Ser-392 of p53/TP53 followin... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                                 |
| NCBI                     | <a href="#">1457</a>                                                                                                                                                                                                                                                       |
| UniProt                  | <a href="#">P68400</a>                                                                                                                                                                                                                                                     |
| Formulierung             | Purified                                                                                                                                                                                                                                                                   |

|                        |                                              |
