| Applikation              | WB                                                                                                                                                                                                                                                            |
| Spezies Reaktivität      | Human, Mouse, Rat                                                                                                                                                                                                                                             |
| Immunogen                | Peptide sequence around phosphorylation site of threonine 11(K-S-T(p)-G-G) derived from Human Histone H3.                                                                                                                                                     |
| Produktbeschreibung      | Core component of nucleosome. Nucleosomes wrap and compact DNA into chromatin, limiting DNA accessibility to the cellular machineries which require DNA as a template. Histones thereby play a central role in transcription regulation, DNA repair, DNA r... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
