| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | Peptide sequence around aa.501~505 (T-S-S-D-S) derived from Human Rel.                                                                                                                                                                                        |
| Produktbeschreibung      | The REL gene encodes c-Rel, a transcription factor that is a member of the Rel/NF-KB family, which also includes RELA (MIM 164014), RELB (604758), NF-KB1 (MIM 164011), and NF-KB2 (MIM 164012). These proteins are related through a highly conserved N-t... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
| Formulierung             | Purified                                                                                                                                                                                                                                                      |
| Target-Kategorie         | Rel (Ab-503)                                                                                                                                                                                                                                                  |
| Application Verdünnung   | Predicted MW: 78kd, Immunofluorescence: 1:100~1:200                                                                                                                                                                                                           |
