| Spezies Reaktivität      | Human, Mouse, Rat                                                                                                                                                                                                                                             |
| Immunogen                | Peptide sequence around aa.6~10(S-Q-M-D-I) derived from Human CD10.                                                                                                                                                                                           |
| Produktbeschreibung      | Thermolysin-like specificity, but is almost confined on acting on polypeptides of up to 30 amino acids. Biologically important in the destruction of opioid peptides such as Met- and Leu-enkephalins by cleavage of a Gly-Phe bond. Able to cleave angiot... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
