| Immunogen                | Peptide sequence around aa.164~168 (A-I-S-E-T) derived from Human MDM2.                                                                                                                                                                                       |
| Produktbeschreibung      | This gene is a target gene of the transcription factor tumor protein p53. The encoded protein is a nuclear phosphoprotein that binds and inhibits transactivation by tumor protein p53, as part of an autoregulatory negative feedback loop. Overexpressio... |
