| Immunogen                | Peptide sequence around aa.31~35 (D-P-E-L-S) derived from Human VEGFR1.                                                                                                                                                                                       |
| Produktbeschreibung      | Receptor for VEGF, VEGFB and PGF. Has a tyrosine-protein kinase activity. The VEGF-kinase ligand/receptor signaling system plays a key role in vascular development and regulation of vascular permeability. Isoform SFlt1 may have an inhibitory role in ... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
