| Immunogen                | Recombinant hCG beta protein                                                                                                                                                                                                                                  |
| Produktbeschreibung      | This MAb reacts with a protein of 22kDa, identified as beta sub-unit of HCG. It does not cross react with the alpha sub-unit. HCG is a glycoprotein, which is secreted in large quantities by normal trophoblasts. It is present only in trace amounts in ... |
