| Immunogen                | Human peripheral lymphocytes                                                                                                                                                                                                                                  |
| Produktbeschreibung      | The mouse monoclonal antibody recognizes CD1b, a 44kDa type I glycoprotein associated with beta2-microglobulin. It is expressed on dendritic cells, Langerhans cells, thymocytes, and T acute lymphoblastic leukemia cells. The CD1 multigene family encod... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
