| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | Recombinant fragment of human Cathepsin D protein (around aa 104-250) (exact sequence is proprietary)                                                                                                                                                         |
| Produktbeschreibung      | Cathepsin D is a ubiquitously expressed lysosomal aspartyl protease involved in the normal degradation of proteins. It is synthesized as an inactive 43kDa preprocathepsin D that is cleaved and glycosylated to form a 46kDa procathepsin D and then furt... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [CTSD/3276]                                                                                                                                                                                                                                                   |
| NCBI                     | <a href="#">1509</a>                                                                                                                                                                                                                                          |

|                        |                                                                                                                                                                                                                                                             |
