| Immunogen                | Recombinant full-length human BTLA protein                                                                                                                                                                                                                    |
| Produktbeschreibung      | B and T lymphocyte attenuator (BTLA) is an immunoglobulin domain-containing glycoprotein whose expression is induced during T-cell activation. BTLA is similar to CTLA-4 and PD-1, all of which are coinhibitory receptors belonging to the CD28 family. H... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [BTLA/1528]                                                                                                                                                                                                                                                   |
