| Immunogen                | Recombinant human Filaggrin protein fragment (aa 198-288) (exact sequence is proprietary)                                                                                                                                                                     |
| Produktbeschreibung      | Filaggrin is an intermediate filament-associated protein that aggregates keratin intermediate filaments in mammalian epidermis. It is initially synthesized as a polyprotein precursor, profilaggrin (consisting of multiple filaggrin units of 324 aa eac... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [FLG/1561]                                                                                                                                                                                                                                                    |
| NCBI                     | <a href="#">2312</a>                                                                                                                                                                                                                                          |

|                        |                                                                                                                                                                                                                                                |
