| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | Recombinant fragment (around aa 38-165) of human FTL protein (exact sequence is proprietary)                                                                                                                                                                  |
| Produktbeschreibung      | Mammalian ferritins consist of 24 subunits made up of 2 types of polypeptide chains, ferritin heavy chain and ferritin light chain. Ferritin heavy chains catalyze the first step in iron storage, the oxidation of Fe (II), whereas ferritin light chains... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [FTL/1388]                                                                                                                                                                                                                                                    |
| NCBI                     | <a href="#">2512</a>                                                                                                                                                                                                                                          |

|                        |                                                                                                                                                                                                                                                             |
