| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | ELISA, IHC, WB                                                                                                                                                                                                                                                |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | Recombinant human MTAP protein fragment (aa97-196) (exact sequence is proprietary)                                                                                                                                                                            |
| Produktbeschreibung      | Recognizes a protein of 31kDa, which is identified as MTAP (5-deoxy-5-methylthioadenosine phosphorylase). It catalyzes the reversible phosphorolysis of methylthioadenosine, which is important in polyamine metabolism and for the salvage of adenine and... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [MTAP/3137R]                                                                                                                                                                                                                                                  |
| NCBI                     | <a href="#">4507</a>                                                                                                                                                                                                                                          |

|                        |                                                                                                                                                                                                                                                                 |
