| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | Recombinant fragment of human KRT20 protein (around aa 196-323) (exact sequence is proprietary)                                                                                                                                                               |
| Produktbeschreibung      | This MAb recognizes an intermediate filament protein of 46kDa, identified as cytokeratin 20 (KRT20). KRT is abundantly expressed in goblet cells and enterocytes of the gastrointestinal tract. It is a useful marker of pancreatic and colorectal cancer.... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [KRT20/1992]                                                                                                                                                                                                                                                  |
| NCBI                     | <a href="#">54474</a>                                                                                                                                                                                                                                         |

|                        |                                                                                                                                                                                                                                                            |
