| Immunogen                | Recombinant human ATRX protein                                                                                                                                                                                                                                |
| Produktbeschreibung      | ATRX is a member of the Snf2 family of helicase/ATPases, which contribute to the remodeling of the nucleosome structure in an ATP-dependent manner, and facilitate the initiation of transcription and replication. Structurally, ATRX contains a PHD zinc... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [ATRX/2900R]                                                                                                                                                                                                                                                  |
