| Immunogen                | Stimulated human leukocytes                                                                                                                                                                                                                                   |
| Produktbeschreibung      | Recognizes a protein of 205kDa-220kDa, identified as CD45RA. CD45RA is isoforms of the human leukocyte common antigen (CD45). Human CD45 contains three exons which encode peptide segments designated A, B and C, respectively. The differential splicing... |
