| Immunogen                | Recombinant human CD28 protein                                                                                                                                                                                                                                |
| Produktbeschreibung      | Recognizes a glycoprotein of 44-88kDa, which is identified as CD28. It is the critical T-cell co-stimulatory receptor which provides to the cell the important second activation signal by binding CD80 and CD86 that are expressed by antigen presenting ... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
