| Immunogen                | Mouse CD25+ CD4+ T cells                                                                                                                                                                                                                                        |
| Produktbeschreibung      | GITR (glucocorticoid-induced TNFR-related gene) is a member of the TNF-alpha receptor superfamily, also known as TNFRSF18. It is expressed at low levels on resting T lymphocytes and at high levels on CD25+CD4+Tregs. The expression of GITR on T cells ca... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                      |
| Klon-Bezeichnung         | [DTA-1]                                                                                                                                                                                                                                                         |
| NCBI                     | <a href="#">21936</a>                                                                                                                                                                                                                                           |
| UniProt                  | <a href="#">O35714</a>                                                                                                                                                                                                                                          |

|                        |                                                                                 |
|------------------------|---------------------------------------------------------------------------------|
| Application Verdünnung | Flow Cytometry (0.5-1ug/million cells in 0.1ml), Immunofluorescence (1-2ug/ml), |
|------------------------|---------------------------------------------------------------------------------|
