| Immunogen                | Recombinant human HSP90alpha, Specificity mapped to amino acids 604-731                                                                                                                                                                                       |
| Konjugation              | ATTO-594                                                                                                                                                                                                                                                      |
| Produktbeschreibung      | HSP90 is an abundantly and ubiquitously expressed heat shock protein. It is understood to exist in two principal forms alpha and beta, which share 85% sequence amino acid homology. The two isoforms of HSP90, are expressed in the cytosolic compartment... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [Hyb-K41009]                                                                                                                                                                                                                                                  |

|                        |                                                                                           |
