| Spezies Reaktivität      | Human, Mouse, Rat, Yeast                                                                                                                                                                                                                                      |
| Immunogen                | Recombinant human HSP90alpha, Specificity mapped to amino acids 291-304                                                                                                                                                                                       |
| Konjugation              | FITC                                                                                                                                                                                                                                                          |
| Produktbeschreibung      | HSP90 is an abundantly and ubiquitously expressed heat shock protein. It is understood to exist in two principal forms alpha and beta, which share 85% sequence amino acid homology. The two isoforms of HSP90 are expressed in the cytosolic compartment.... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
