| Immunogen                | Full length protein HSP90 purified from chicken brain                                                                                                                                                                                                         |
| Konjugation              | Biotin                                                                                                                                                                                                                                                        |
| Produktbeschreibung      | HSP90 is an abundantly and ubiquitously expressed heat shock protein. It is understood to exist in two principal forms alpha and beta, which share 85% sequence amino acid homology. The two isoforms of HSP90 are expressed in the cytosolic compartment.... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [D7A]                                                                                                                                                                                                                                                         |
| NCBI                     | <a href="#">423463</a>                                                                                                                                                                                                                                        |

|                        |                                                                                       |
