| Produktbeschreibung      | HSP90 is an abundantly and ubiquitously expressed heat shock protein. It is understood to exist in two principal forms alpha and beta, which share 85% sequence amino acid homology. The two isoforms of HSP90 are expressed in the cytosolic compartment.... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
