Product Datasheet

Rat anti Mouse alpha-2 macroglobulin, Clone: [Polyclonal], Monoclonal NMB-RAAM/A2M

Artikelname	Rat anti Mouse alpha-2 macroglobulin, Clone: [Polyclonal], Monoclonal
Artikelnummer	NMB-RAAM/A2M
Hersteller Artikelnummer	RaAM/A2M
Alternativnummer	NMB-RAAM/A2M
Hersteller	NordicMubio
Wirt	Rat
Kategorie	Antikörper
Produktbeschreibung	The reactivity of the antiserum is restricted to alpha-2 macroglobulin as tested in immunoelectrophoresis and radial immunodiffusion. A characteristic single precipitin line is obtained with normal serum which shows a reaction of identity with the pr...
Klonalität	Monoclonal
Klon-Bezeichnung	[Polyclonal]
Puffer	Delipidated, heat inactivated, lyophilized, stable whole antiserum. No preservative added Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal rat serum. No foreign proteins added. Reconstitute the lyophilized ant
Quelle	Alpha-2 macroglobulin ids the major protein in the alpha-2 region of mouse serum after separation by electrophoresis. It is a large polymer and a strong antigen. It forms about one-third in the total of the alpha-2 globulins. The protein is isolated by am

Formel	Delipidated, heat inactivated, lyophilized, stable whole antiserum. No preservative added Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal rat serum. No foreign proteins added.
Anwendungsbeschreibung	Precipitation assays. In immunoelectrophoresis use 2 μ l serum or equivalent against 120 μ l antiserum. In double radial immunodiffusion use a rosette arrangement with 10 μ l antiserum in 3 mm diameter centre well and 2 μ l serum samples (neat and serially diluted) in 2 mm diameter peripheral wells.
