Sheep anti Human Factor H, Clone: [Polyclonal], Monoclonal NMB-SHAHU/FH

Artikelname	Sheep anti Human Factor H, Clone: [Polyclonal], Monoclonal
Artikelnummer	NMB-SHAHU/FH
Hersteller Artikelnummer	ShAHu/FH
Alternativnummer	NMB-SHAHU/FH
Hersteller	NordicMubio
Wirt	Sheep
Kategorie	Antikörper
Produktbeschreibung	The reactivity of the antiserum is restricted to factor H. In immunoelectrophoresis and radial immunodiffusion, using various antiserum concentrations against human EDTA plasma a single precipitin line is obtained and shows a reaction of full identit...
Klonalität	Monoclonal
Klon-Bezeichnung	[Polyclonal]
NCBI	3075
UniProt	P08603
Puffer	Delipidated, heat inactivated, lyophilized, stable IgG fraction. No preservative added. Total protein and IgG concentration are comparable to those of pooled normal sheep serum. No foreign proteins added. Reconstitute the lyophilized antiserum by adding 1

Quelle	Factor H is a serum protein acting as an inhibitor in the complement activation system. I activates the C3/C5 convertase by dissociating its subunits and also acts as a cofactor for the enzyme activity of Factor I. It has been isolated as a homogenous pro
Formel	Delipidated, heat inactivated, lyophilized, stable IgG fraction. No preservative added. Total protein and IgG concentration are comparable to those of pooled normal sheep serum. No foreign proteins added.
Anwendungsbeschreibung	Precipitation assays. In immunoelectrophoresis in agarose-plates use 2 µl human plasma or equivalent against 120 µl antiserum. In double radial immunodiffusion use a rosette arrangement with 10 µl antiserum in 3 mm diameter center well and 2 µl plasma samples (neat and serially diluted) in 2 mm diameter peripheral wells. In electroimmunodiffusion (Laurell) use a concentration of 1% of the antiserum in the gel.
