| Hersteller               | EXBIO                                                                                                                                                                                                                                                         |
| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | FC, ICC, IHC-Fr, IHC-P, IP, WB                                                                                                                                                                                                                                |
| Spezies Reaktivität      | Human, Mouse, Primate, Rat                                                                                                                                                                                                                                    |
| Immunogen                | recombinant human cyclin D1 (amino acids 1-295)                                                                                                                                                                                                               |
| Produktbeschreibung      | Cyclin D1 (PRAD1, Bcl-1) is a cytoplasmic and nuclear protein, which is synthesized during G1 phase and assembles with either cyclin-dependent kinase 4 (CDK4) or CDK6 in response to growth factor stimulation. D-type cyclin-CDK complexes act to inacti... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 1 mg/ml                                                                                                                                                                                                                                                       |
| Klon-Bezeichnung         | [DCS-6]                                                                                                                                                                                                                                                       |
| Isotyp                   | Mouse IgG2a                                                                                                                                                                                                                                                   |
| Puffer                   | Phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide                                                                                                                                                                                                   |
| Lagerung                 | 2°C to 8°C                                                                                                                                                                                                                                                    |

|                        |                                                                                                                                   |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------------|
| Target-Kategorie       | Cyclin D1                                                                                                                         |
| Antibody Type          | Monoclonal Antibody                                                                                                               |
| Anwendungsbeschreibung | Immunohistochemistry: Recommended dilution: 5-10 µg/ml. Flow cytometry: Recommended dilution: 3-12 µg/ml. Intracellular staining. |
