| Produktbeschreibung      | CD193 / CCR3 is a G-protein coupled receptor for several chemokines, namely CCL11 (eotaxin), CCL26 (eotaxin-3), CCL7 (MCP-4), or CCL5 (RANTES). It is highly expressed on eosinophils and basophils, and is also detected in TH1 and TH2 cells, as well as... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [5E8]                                                                                                                                                                                                                                                         |
| Isotyp                   | Mouse IgG2b kappa                                                                                                                                                                                                                                             |
| Puffer                   | Stabilizing phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide                                                                                                                                                                                       |

|                        |                                                                                                                                                                                                                            |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Lagerung               | 2°C to 8°C                                                                                                                                                                                                                 |
| Target-Kategorie       | CD193                                                                                                                                                                                                                      |
| Antibody Type          | Monoclonal Antibody                                                                                                                                                                                                        |
| Application Verdünnung | Flow cytometry: The reagent is designed for analysis of human blood cells using 4 µl reagent / 100 µl of whole blood or 10 <sup>6</sup> cells in a suspension. The content of a vial (0.4 ml) is sufficient for 100 tests. |
