| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | FA, FC, ICC, IHC-Fr, IHC-P, IP, WB                                                                                                                                                                                                                            |
| Spezies Reaktivität      | Primate, Rat                                                                                                                                                                                                                                                  |
| Immunogen                | Rat T blasts and erythrocytes                                                                                                                                                                                                                                 |
| Produktbeschreibung      | The antigen-specific T cell receptor (TCR) is composed of either alpha and beta subunit, or gamma and delta subunit. Majority of T cells present in the blood, lymph and secondary lymphoid organs express TCR alpha/beta heterodimers, whereas the T cell... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 1 mg/ml                                                                                                                                                                                                                                                       |
| Klon-Bezeichnung         | [R73]                                                                                                                                                                                                                                                         |
| Isotyp                   | Mouse IgG1 kappa                                                                                                                                                                                                                                              |
| Puffer                   | Phosphate buffered saline (PBS), pH 7.4                                                                                                                                                                                                                       |

|                        |                                                                                                                                              |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------|
| Target-Kategorie       | TCR alpha/beta                                                                                                                               |
| Antibody Type          | Monoclonal Antibody                                                                                                                          |
| Anwendungsbeschreibung | Flow cytometry: Recommended dilution: 1-4 µg/ml.Functional application: In vitro activation and in vivo depletion of alpha/beta TCR T cells. |
