| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Produktbeschreibung      | 2E10 was generated by immunizing BALB/c mice with a DNA vaccine containing the human alpha2 I-domain cDNAsequence within pVAC2. The alpha2 I-domain is expressed as a fusion protein with fragment C of tetanus toxoid (FrC-TT). The scFv was then created... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [2E10]                                                                                                                                                                                                                                                        |
| Isotyp                   | Fab fragment                                                                                                                                                                                                                                                  |
