Product Datasheet

Anti-RFA | Bakers yeast replication factor A, Rabbit, Polyclonal AGR-AS07-214

Artikelname	Anti-RFA Bakers yeast replication factor A, Rabbit, Polyclonal
Artikelnummer	AGR-AS07-214
Hersteller Artikelnummer	AS07-214
Alternativnummer	AGR-AS07-214
Hersteller	Agrisera
Wirt	Rabbit
Kategorie	Antikörper
Applikation	ChIP, IP, WB
Spezies Reaktivität	Yeast
Immunogen	RPA from <i>Saccharomyces cerevisiae</i> consisting of three subunits RFA1 (70 kDa), RFA2 (30 kDa) and RFA3 (14 kDa), overexpressed in <i>E.coli</i> and purified by chromatography, no affinity tags were added to any of three subunits
Produktbeschreibung	<i>Saccharomyces cerevisiae</i> replication protein A (RPA), also known as replication factor A (RFA) is a single-stranded DNA-binding protein that is required for multiple processes in eukaryotic DNA metabolism. Those processes include DNA replication, DNA...
Klonalität	Polyclonal
Molekulargewicht	70 + 30 + 14 kDa
NCBI	851266

UniProt	P22336
Reinheit	Serum
Formulierung	Lyophilized
Antibody Type	Polyclonal Antibody
Application Verdünnung	ChIP, 1 : 20 000 (WB)
Anwendungsbeschreibung	Antibody was also successfully used in ChIP application Holstein et al. (2014). Load of 1 ng of the protein will allow to visualize two subunits of RPA, while load of 5 ng will allow to visualize all three subunits in Western blot technique.
