| Alternativnummer         | AGR-AS08-344                                                                                                                                                                                                                                                  |
| Hersteller               | Agrisera                                                                                                                                                                                                                                                      |
| Wirt                     | Rabbit                                                                                                                                                                                                                                                        |
| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | WB                                                                                                                                                                                                                                                            |
| Spezies Reaktivität      | Bacteria, Plant                                                                                                                                                                                                                                               |
| Immunogen                | recombinant clpB1 protein, derived from Synechocystis PCC 6803 strain slrl641 sequence, protein has an internal translation site. The nomenclature used is reverse of what is mentioned in the cyanobase.                                                     |
| Produktbeschreibung      | ClpB protein is essential for resistance to high temperature stress. It functions to dissolve inactive protein aggregates that accumulate at high temperatures. Giese and Vierling (2002) Changes in oligomerization are essential for the chaperone activ... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
| Molekulargewicht         | 98.1   85.4 and 105   95 kDa for Synechocystis                                                                                                                                                                                                                |
| UniProt                  | <a href="#">P74459</a>                                                                                                                                                                                                                                        |

|                        |                                                |
|------------------------|------------------------------------------------|
| Reinheit               | Serum                                          |
| Formulierung           | Lyophilized                                    |
| Antibody Type          | Polyclonal Antibody                            |
| Application Verdünnung | 1 : 3000 (WB)                                  |
| Anwendungsbeschreibung | For reconstitution add 100 µl of sterile water |
