## Product Datasheet

### **Anti-8-Hydroxyguanosine | DNA/RNA oxidative damage (clone 15A3), IgG2a, Mouse, Monoclonal AGR-AS10-708-25**

|                          |                                                                                                                                 |
|--------------------------|---------------------------------------------------------------------------------------------------------------------------------|
| Artikelname              | Anti-8-Hydroxyguanosine   DNA/RNA oxidative damage (clone 15A3), IgG2a, Mouse, Monoclonal                                       |
| Artikelnummer            | AGR-AS10-708-25                                                                                                                 |
| Hersteller Artikelnummer | AS10-708-25                                                                                                                     |
| Alternativnummer         | AGR-AS10-708-25                                                                                                                 |
| Hersteller               | Agrisera                                                                                                                        |
| Wirt                     | Mouse                                                                                                                           |
| Kategorie                | Antikörper                                                                                                                      |
| Applikation              | ELISA, IAP                                                                                                                      |
| Immunogen                | 8-hydroxy-guanosine-BSA and - casein conjugates                                                                                 |
| Produktbeschreibung      | Oxidative derivate of guanosine is called 8-Hydroxyguanosine (8OHdG) and is used as a popular biomarker of oxidative stress.... |
| Klonalität               | Monoclonal                                                                                                                      |
| Isotyp                   | IgG2a                                                                                                                           |
| Reinheit                 | Total IgG fraction. Protein G purified.                                                                                         |
| Formulierung             | Liquid                                                                                                                          |
| Antibody Type            | Monoclonal Antibody                                                                                                             |

|                        |                                                                       |
|------------------------|-----------------------------------------------------------------------|
| Application Verdünnung | The optimal working dilution should be determined by the investigator |
| Anwendungsbeschreibung | Protocol for immunostaining using this antibody can be found here.    |
