| Immunogen                | purified chicken IgY, whole molecule                                                                                                                                                                                                          |
| Konjugation              | DyLight 350                                                                                                                                                                                                                                   |
| Produktbeschreibung      | Goat anti-chicken IgY, DyLight 350 Conjugate is a secondary antibody conjugated to DyLight 350, which binds to hen immunoglobulins in immunological assays. DyLight is a trademark of Thermo Fisher Scientific, Inc. and its subsidiaries.... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                    |
| Reinheit                 | Immunogen affinity purified goat IgG.                                                                                                                                                                                                         |
| Formulierung             | Lyophilized                                                                                                                                                                                                                                   |
| Antibody Type            | Polyclonal Antibody                                                                                                                                                                                                                           |

|                        |                                                                                                                                                                                                                                             |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Application Verdünnung | 1 : 50 -1 : 5 000 (ICC), 1 : 20- 1 : 2000 (IHC)                                                                                                                                                                                             |
| Anwendungsbeschreibung | Based on immunoelectrophoresis this antibody reacts with heavy chains on chicken IgG and light chains on all chicken immunoglobulins.No reactivity is observed to non-immunoglobulin chicken serum proteins based in immunoelectrophoresis. |
