| Hersteller               | Agrisera                                                                                                                  |
| Wirt                     | Goat                                                                                                                      |
| Kategorie                | Antikörper                                                                                                                |
| Applikation              | DOT, ELISA, ICC, IF, IHC                                                                                                  |
| Spezies Reaktivität      | Canine                                                                                                                    |
| Immunogen                | purified dog IgG                                                                                                          |
| Konjugation              | fitc                                                                                                                      |
| Produktbeschreibung      | Goat anti-Dog IgG Fc, FITC conjugated is a secondary antibody which binds to dog IgG Fc part, in immunological assays.... |
| Klonalität               | Polyclonal                                                                                                                |
| Reinheit                 | Protein G purified goat IgG in PBS pH 7.2.                                                                                |
| Formulierung             | Lyophilized                                                                                                               |
| Antibody Type            | Polyclonal Antibody                                                                                                       |

|                        |                                                                                                                                                                                                                                                                 |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Application Verdünnung | 1 : 15 -1 :60 (Dot), (ELISA), (ICC), (IHC, frozen), (IF), The optimum working dilution should be established by titration by end user, Excess labelled antibody should be avoided since it may cause high unspecific background staining and interfere with the |
| Anwendungsbeschreibung | This antibody is not species-specific since inter-species cross-reactivity is a normal feature of antibody to immunoglobulins. Cross-reactivity of this antiserum has not been tested in detail.No preservative is added.                                       |
