### Goat anti-Dog IgG (H&L), FITC conjugated, Polyclonal AGR-AS16-3126

|                          |                                                                                                                                           |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| Artikelname              | Goat anti-Dog IgG (H&L), FITC conjugated, Polyclonal                                                                                      |
| Artikelnummer            | AGR-AS16-3126                                                                                                                             |
| Hersteller Artikelnummer | AS16-3126                                                                                                                                 |
| Alternativnummer         | AGR-AS16-3126                                                                                                                             |
| Hersteller               | Agrisera                                                                                                                                  |
| Wirt                     | Goat                                                                                                                                      |
| Kategorie                | Antikörper                                                                                                                                |
| Applikation              | ELISA, ICC, IF, IHC                                                                                                                       |
| Spezies Reaktivität      | Canine                                                                                                                                    |
| Immunogen                | Purified normal IgG isolated from pooled dog serum                                                                                        |
| Konjugation              | fitc                                                                                                                                      |
| Produktbeschreibung      | Goat anti-Dog IgG (H&L), FITC conjugated is a secondary antibody which binds to dog IgG heavy and light chain in immunological assays.... |
| Klonalität               | Polyclonal                                                                                                                                |
| Reinheit                 | Protein G purified goat IgG in PBS pH 7.2.                                                                                                |
| Formulierung             | Lyophilized                                                                                                                               |
| Antibody Type            | Polyclonal Antibody                                                                                                                       |

|                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Application Verdünnung | 1 : 20-1 : 120 (ICC) (IHC), (IF), The optimal working dilution should be established by titration by the end user, Excess labelled antibody should be avoided since it may cause high unspecific background staining and interfere with the specific signal                                                                                                                                                                                        |
| Anwendungsbeschreibung | Inter-species cross-reactivity is a normal feature of antibodies to immunoglobulins, since Ig of different species frequently share antigenic determinants. Cross-reactivity of this antiSerum has not been tested in detail. No preservative added. The reactivity of the antiserum is directed to the Fc and Fab subunits of the IgG molecule. It includes a certain degree of reactivity with other immunoglobulins via the common Fab portion. |
