| Immunogen                | Overexpressed Zea mays GUS-ABP1 protein, UniProt: P13689                                                                                                                                                                                                      |
| Produktbeschreibung      | ABP1 is an auxin receptor which regulates polar auxin transport. It is involved in the shade avoidance response, controls cell division and elongation, controls the size of a root meristem and mediates auxin responsiveness. ABP1 promotes endocytosis ... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
| Molekulargewicht         | 18.4 kDa                                                                                                                                                                                                                                                      |
