| Immunogen                  | Thymocytes and peripheral blood lymphocytes from a Sezary Syndrome donor                                                                                                                                                                                      |
| Conjugation                | APC/Cy7                                                                                                                                                                                                                                                       |
| Product Description        | The monoclonal UCHT1 clone recognizes CD3epsilon antigen, a 20KDa transmembrane cell-surface protein that belongs to the immunoglobulin superfamily. The CD3 complex contains a CD3gamma chain, a CD3delta chain, and two CD3epsilon chains. These chains ... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Clone Designation          | [UCHT1]                                                                                                                                                                                                                                                       |
| Isotype                    | IgG1,k                                                                                                                                                                                                                                                        |
| NCBI                       | <a href="#">916</a>                                                                                                                                                                                                                                           |
