Goat anti Human alpha and beta lipoproteins, Clone: [Polyclonal], Monoclonal NMB-GAHU/LP

Article Name	Goat anti Human alpha and beta lipoproteins, Clone: [Polyclonal], Monoclonal
Biozol Catalog Number	NMB-GAHU/LP
Supplier Catalog Number	GAHu/Lp
Alternative Catalog Number	NMB-GAHU/LP
Manufacturer	NordicMubio
Host	Goat
Category	Antikörper
Product Description	The reactivity of the antiserum is restricted to lipoproteins. In immunoelectrophoresis and radial immunodiffusion (Ouchterlony), using various antiserum concentrations against fresh normal human plasma three precipitin lines are obtained. No reactio...
Clonality	Monoclonal
Clone Designation	[Polyclonal]
Buffer	Delipidated, heat inactivated, lyophilized, stable whole antiserum No preservative added. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal goat serum. No foreign proteins added. Reconstitute the lyophilized an
Source	Lipoproteins form a heterogeneous system of protein-lipid-carbohydrate complexes which provides highly efficient transport of phospholipids, glycolipids, fatty acids, mono-, di- and triglycerides, cholesterol and cholesteroles. Concentrations in norma

Formula	Delipidated, heat inactivated, lyophilized, stable whole antiserum No preservative added. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal goat serum. No foreign proteins added.
Application Notes	Precipitation assays. Dilutions may be prepared by adding phosphate buffered saline (PBS, pH 7.2). Repeated thawing and freezing should be avoided. If a slight precipitation occurs upon storage, this should be removed by centrifugation. It will not affect the performance of the antiserum. Diluted antiserum should be stored at +4C, not refrozen, and preferably used the same day.
