Product Datasheet

Goat anti Mouse IgE (Fc specific), Clone: [Polyclonal], Monoclonal NMB-GAM/IGE(FC)

Article Name	Goat anti Mouse IgE (Fc specific), Clone: [Polyclonal], Monoclonal
Biozol Catalog Number	NMB-GAM/IGE(FC)
Supplier Catalog Number	GAM/IgE(Fc)
Alternative Catalog Number	NMB-GAM/IGE(FC)
Manufacturer	NordicMubio
Host	Goat
Category	Antikörper
Species Reactivity	Mouse
Conjugation	Unconjugated
Format	Antiserum
Target Specificity	IgE
Cross-Adsorption (MinX)	no cross-adsorbtion
Product Description	The reactivity of the antiserum is restricted to the Fc portion of the IgE molecule, which represents strict isotype (class specificity. In immunoelectrophoresis and radial immunodiffusion, using various antiserum concentrations against mouse serum. ...
Clonality	Monoclonal
Clone Designation	[Polyclonal]

Buffer	Delipidated, heat inactivated, lyophilized, stable whole antiserum No preservative added. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal goat serum. No foreign proteins added. Reconstitute the lyophilized an
Source	Highly purified monoclonal IgE isolated from mouse serum. Freund's complete adjuvant is used in the first step of the immunization procedure.
Formula	Delipidated, heat inactivated, lyophilized, stable whole antiserum No preservative added. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal goat serum. No foreign proteins added.
Antibody Type	Secondary Antibody
Application Notes	Precipitation assays. Dilutions may be prepared by adding phosphate buffered saline (PBS, pH 7.2). Repeated thawing and freezing should be avoided. If a slight precipitation occurs upon storage, this should be removed by centrifugation. It will not affect the performance of the antiserum. Diluted antiserum should be stored at +4C, not refrozen, and preferably used the same day.
