Buffer	Delipidated, heat inactivated lyophilized stable whole serum. No preservative added. Total protein and IgG concentration in the antiserum are comparable to those of pooled rabbit serum. It is reconstituted by adding 1 ml sterile distilled water.
Source	Purified Fab of normal guinea pig IgG. Freund's complete adjuvant is used in the first step of the immunization procedure.
Formula	Delipidated, heat inactivated lyophilized stable whole serum. No preservative added. Total protein and IgG concentration in the antiserum are comparable to those of pooled rabbit serum.
Antibody Type	Secondary Antibody
Application Notes	Precipitation assays. In immunoelectrophoresis use 2 $\mu$ l or equivalent against 120 $\mu$ l antiserum. In double radial immunodiffusion (Ouchterlony) use a rosette arrangement with 10 $\mu$ l antiserum in a 3 mm diameter centre well and 2 $\mu$ l serum samples (neat and diluted) in 2 mm diameter peripheral wells.
