## Product Datasheet

### **Rabbit anti Mouse IgG1 (subclass specific), Clone: [Polyclonal], Monoclonal NMB-RAM/IGG1**

Article Name	Rabbit anti Mouse IgG1 (subclass specific), Clone: [Polyclonal], Monoclonal
Biozol Catalog Number	NMB-RAM/IGG1
Supplier Catalog Number	RAM/IgG1
Alternative Catalog Number	NMB-RAM/IGG1
Manufacturer	NordicMubio
Host	Rabbit
Category	Antikörper
Species Reactivity	Mouse
Conjugation	Unconjugated
Format	Antiserum
Target Specificity	IgG1 (Fc)
Cross-Adsorption (MinX)	no cross-adsorbtion
Product Description	The reactivity of the antiserum is directed to the subclass IgG1. It does not react with other subclasses of IgG, IgG/Fab fragments, IgM and IgA or any non-Ig protein in mouse serum, as tested by immunoelectrophoresis and double radial immunodiffusio...
Clonality	Monoclonal
Clone Designation	[Polyclonal]

Buffer	Delipidated, heat inactivated, lyophilized whole antiserum No preservative added, as it may interfere with the antibody activity Total protein and IgG concentration in the antiserum are comparable to those of pooled normal rabbit serum. No foreign protein
Source	Pools of purified homogenous IgG1 isolated from pooled mouse serum. Freund's complete adjuvant is used in the first step of the immunization procedure
Formula	Delipidated, heat inactivated, lyophilized whole antiserum No preservative added, as it may interfere with the antibody activity Total protein and IgG concentration in the antiserum are comparable to those of pooled normal rabbit serum. No foreign protei
Antibody Type	Secondary Antibody
Application Notes	Precipitation assays. In immunoelectrophoresis use 2 $\mu$ l or equivalent against 120 $\mu$ l antiserum. In double radial immunodiffusion (Ouchterlony) use a rosette arrangement with 10 $\mu$ l antiserum in a 3 mm diameter centre well and 2 $\mu$ l serum samples (neat and diluted) in 2 mm diameter peripheral wells
