| Product Description        | TCRalpha/beta (T-cell receptor) is a 40-55 kD disulfide-linked membrane bound heterodimeric protein normally consisting of the highly variable alpha and beta chains expressed as part of a complex with the invariant CD3 chain molecules and binding of ... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
