| Category                   | Biochemikalien                                                                                                                                                                                                                                                |
| Product Description        | Nicotinamide, the water-soluble amide of nicotinic acid, is a component of the two most important coenzymes - nicotinamide adenine dinucleotide and nicotinamide adenine dinucleotide phosphate. Thus nicotinamide is involved in numerous oxidation-reduc... |
| Molecular Weight           | 122.1                                                                                                                                                                                                                                                         |
| Form                       | 50 mM Nicotinamide in 50 mM Tris/Cl, pH 8.0, 137 mM NaCl, 2.7 mM KCl, 1 mM MgCl <sub>2</sub> .                                                                                                                                                                |
| CAS Number                 | [98-92-0]                                                                                                                                                                                                                                                     |
| Formula                    | C <sub>6</sub> H <sub>6</sub> N <sub>2</sub> O                                                                                                                                                                                                                |
