| Category                   | Kits/Assays                                                                                                         |
| Application                | ELISA                                                                                                               |
| Species Reactivity         | Human                                                                                                               |
| Product Description        | The Adiponectin (human), ELISA kit is a colorimetric, immunometric immunoassay kit with results in <3 hours....     |
| Sensitivity                | 0.156ng/ml (CSF, urine), 0.47ng/ml (plasma, serum) (range 1 to 150ng/ml)                                            |
| UniProt                    | <a href="#">Q15848</a>                                                                                              |
| Target                     | Adiponectin                                                                                                         |
| Application Notes          | For quantitative determination of human adiponectin in cerebrospinal fluid, plasma, serum, urine and (breast) milk. |
