| Application                | HTS                                                                                                                                                                                                                                                           |
| Product Description        | The SCREEN-WELL Epigenetics library contains 43 compounds with defined activity against enzymes which carry out epigenetic modification of lysine. It also includes DNA methylation inhibitors. Compounds are dissolved in DMSO at 10mM and aliquoted into... |
| Application Notes          | Useful tool for chemical genomics, assay development, or other pharmacological applications in the study of epigenetic modifications of lysine and DNA methylation.                                                                                           |
