| Immunogen                  | IgM complex isolated from Daudi cells                                                                                                                                                                                                                         |
| Conjugation                | PE/Cy5                                                                                                                                                                                                                                                        |
| Product Description        | CD79 consist of two proteins, namely CD79a and CD79b. CD79a recognizes the Ig-alpha protein, and CD79b recognizes the Ig-beta protein of the B-cell antigen component of the B-lymphocyte antigen receptor. The expression of CD79 precedes immunoglobulin... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Clone Designation          | [ZL7-4]                                                                                                                                                                                                                                                       |
