| UniProt                    | <a href="#">P28482</a>                                                                                                                                                              |
| Buffer                     | 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2                                                                                                                          |
| Form                       | Lyophilized                                                                                                                                                                         |
| Target                     | Human                                                                                                                                                                               |

|                    |                                                                                                                                                                                               |
|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Antibody Type      | Primary Antibody                                                                                                                                                                              |
| Application Dilute | ELISA: 1:40,000, WB: 1µg/mL                                                                                                                                                                   |
| Application Notes  | Anti-ERK 2 (RABBIT) antibody is suitable for use in ELISA and Western Blotting. Specific conditions of reactivity should be optimized by the end user. Expect a band of approximately 41 kDa. |
