| Manufacturer               | Rockland Immunochemicals                                                                                                                                                                                                                                                  |
| Category                   | Zellen/Zellkultur                                                                                                                                                                                                                                                         |
| Conjugation                | Unconjugated                                                                                                                                                                                                                                                              |
| Product Description        | WM1862 is a non-tumorigenic (RGP) primary human melanoma cell line without metastatic capability. This cell line displays pigmented, mesenchymal and spherical morphology. This cell line features the specific V600E (Val600Glu) mutation at codon 600 in...             |
| Concentration              | 1.0 million cells/mL (Count By Hemocytometer)                                                                                                                                                                                                                             |
| Buffer                     | None                                                                                                                                                                                                                                                                      |
| Source                     | Human                                                                                                                                                                                                                                                                     |
| Form                       | Frozen Cell Suspension                                                                                                                                                                                                                                                    |
| Application Notes          | The key applications of these cell lines include genetic studies, xenograft production, drug testing, and drug target discovery. These cell line models can be used in various biological assays, and for identifying critical target genes, and cell signaling pathways. |
