| Category                   | Zellen/Zellkultur                                                                                                                                                                                                                                             |
| Conjugation                | Unconjugated                                                                                                                                                                                                                                                  |
| Product Description        | Non-viable cell pellet was generated from cell line WM9. WM9 is a human metastatic melanoma cell line that was established from a metastatic site (left axillary node) in a male patient. This cell line features the V600E (Val600Glu) mutation at codon ... |
| Concentration              | 5.0 million cells (Count By Hemocytometer)                                                                                                                                                                                                                    |
| Buffer                     | None                                                                                                                                                                                                                                                          |
| Source                     | Human                                                                                                                                                                                                                                                         |
| Form                       | Frozen Cell Pellet                                                                                                                                                                                                                                            |
| Application Notes          | Frozen non-viable cell pellets can be used for in vitro experiments such as Western blotting and other immunoassays, genomic DNA isolation, STR profiling, and RNA isolation.                                                                                 |
